

Fingerprint / Card Based Time Attendance and Access Control System

FINGKEY ACCESS is a cost effective fingerprint access control system capable of speedy authentication with LFD function (Live Finger Detection) and supports Waterproof at the level of IP65 for outdoor use. It offers you enterprise level of Entry and Time Attendance management with its LAN communication-based network infrastructure enabling integrated monitoring and systematic management of multiple terminals operated independently on a remote location. Compact and stylish design with user friendly interface. FINGKEY ACCESS knocks your door NETWORK to be safe more than ever.

FINGKEY ACCESS

Specifications

ITEM	SPECIFICATIONS
CPU	32bit /200MHz
Memory	8MB Flash
Display	128x32 Graphic LCD (Black &White)
Fingerprint Sensor	Type: Optical Resolution: 500DPI
Authentication Mode	Finger, Password, Card (RF/HID/Mifare)
Fingerprint Sensor	1:1, 1:N Reduced ID matching
Authentication method	
1:1 Verification Time	Less than 1sec
1:N Identification Time	Less than 2sec (2000 templates)
Template capacity	1000 fingerprint
User capacity	20000 logs
Communication	TCO/IP, RS232, Wiegand (26/34 bits)
Output Relay	Deadbolt, EM lock, Door strike, Automatic door
Operating Temperature	-20~60%
Operating Humidity	10~90%
Certification	CE,FCC
Size	90(W)x205(L)x50(D)mm

Product Type

Model Name	Description
Standard Type	Fingerprint+ Password
RF/HID	125 KHz RF card (HID/EM)
Mifare	13.56 MHz RF card (Mifare card)

Features

- Remote control and real-time access monitoring by means of server program (Access Manager)
- Auto-on functions
- User's setup function reinforced
- Reduced ID matching opportunity provided
- Buzzer information
- Various authentication media supported
Fingerprint/Password/ RF card or any combination of the means
- LFD (Live Finger Detection)
- Touch Keypad with Backlight
- IP65 rated waterproof
- CE, FCC certified

Certified
